WireFree™ Motors

100% wireless for 100% satisfaction

With Somfy's independent WireFree™ motors, you can adjust your interior window coverings at the simple press of a button on your remote control.

No need for electrical connections and no cords to pull.

Now, you can get the most out of your window covering investment.

> Your blinds will last longer

As they are operated gently and smoothly. The cords wind up neatly so that your blinds won't get stuck or come down unevenly.

> Feel good every day

Without getting up from your seat, just a click and you can filter the daylight, protect your privacy, or let daylight in. Just press a button on your remote control: the roller blind goes up or down, or the Venetian blind slats rotate to the position you want.

> Feel secure

You can program the movements of your blinds depending on the time of day, or let a sensor automatically operate them as the sun appears.

As well as protecting your furnishings from sunlight – you also protect your property by making it look as though someone is at home.

A wide range of possibilities to make your life brighter

WireFree™ motors can adapt to most types of interior window coverings, including roller, solar shades, wooden Venetian blinds, etc.

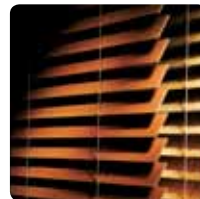

ROLLER BLINDS

PLEATED BLINDS

METAL VENETIAN
BLINDS

WOOD VENETIAN
BLINDS

ROMAN BLINDS

A choice of remote-controls, from the simplest to the most sophisticated.

Radio Technology Somfy® remote controls operate your blinds by a secure radio transmission, with a range of 20 m, even through concrete walls.

SOMFY INNOVATION

A unique scroll-wheel handset allows you to adjust your Venetian blind slats to the desired angle for perfect daylight filtering.

Situo RTS

Battery powered radio wall switch. To control a single or group of blinds.

Telis 1 RTS*

Single channel radio handset. To control a single or group of blinds.

Telis 4 RTS*

Multi channel radio handset. To control multiple blinds independently or as a group.

Telis 1 & 4 Modulus RTS*

Single and Multi channel radio handsets with precise central scroll wheel adjustment.

Chronis RTS

Single channel radio timer. To control a single or group of blinds.

*Somfy RTS Handset Finish

Handsets from the Somfy RTS control range are available in a variety of different finishes:

PURE - Gloss white finish with matt grey trim.

SILVER - Metallic silver finish with matt grey trim.

LOUNGE - Liquid black finish with matt black trim.

NB: RTS remote controls are sold separately.

No wires... that changes everything!

What's important...

The choice

Most types of interior blinds can be powered with a Somfy WireFree™ motor. The motor is installed out of sight in the headrail at the top of the blind or inside the roller tube.

What else is important...

The system is quick to install, with no electrician costs and no damage to your décor

A WireFree™ powered blind can be installed very quickly, just like a manual shade or blind. No electrical connections are needed, and no wire connecting it to the remote control is needed.

The innovation that changes everything!

Low-consumption motors

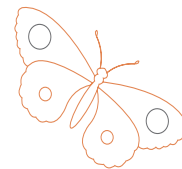

A Somfy-exclusive patent means that a Somfy WireFree™ motor consumes only the amount of energy that is strictly necessary, and only when it is being used, so the battery lifetime is optimised. There is even an option to select a re-loadable battery wand, so when your batteries reach the end of their life, you can easily replace them yourself.

Re-loadable
Battery Wand

CE Somfy products are supplied with a 5-year warranty from the manufacturing date on its motors and controls. For more information, discuss this topic with your blind retailer.

WireFree™

Battery Powered Motors for Blinds

A WireFree™ range of solutions for interior motorised blinds

Convenience, safety and security using Home Motion by Somfy

With Somfy's battery powered range of motor and control solutions, you can bring your interior blinds to life. With an automated solution for the majority of interior blinds and different battery options to power them, Somfy have a system to meet the requirements of every user. Motorised blinds offer a number of advantages in comparison to manually operated blinds.

For example, motorised blinds provide the following benefits:

- Easily adjust hard-to-reach window blinds
- Enhance child safety by eliminating the need for pull cords that are required for manual blinds
- Fine-tune daylight, manage glare and operate blinds to adjust the light level to your preferred ambience
- Automatically protect valuable furnishings from the sun's rays
- Maintain your privacy and enhance security with the addition of automatic timers and sensors
