

MASTER PLAN

URBAN CONCEPT FOR THE BLOCK 39

The pertinent task at hand in the development for the Block 39 is in maintaining as much of the existing green area and sufficient open areas for further developments in the future. Common gardens are placed adjacent to each buildings for softening the visual mass propounded onto the site. The block is open and accessible to the general public with a centre garden in its core, of which will be a mingling hub for all users. The master plan for the Block 39 offers maximum flexibility in the planning for the additional buildings and cater for possible changes in the future. The simple orthogonal forms to the semblance of the existing art drama school is one which will facilitate expansion and shrinkage, whilst maintaining harmony with the entire premise.
